## FOREWORD

The Central Bureau Of Health Intelligence (CBHI) has been regularly bringing out its annual publication "National Health profile (NHP)" since the calendar year 2005. It **involves** sustained, systematic and sincere efforts to collect and collate an enormous national data from the directorates of Health & FW Services of all the 35 States / UTs, central government organizations, national health programmes and various other concerned national & international agencies in India.

This publication (NHP) of **vital national importance highlights** most of the relevant information under six major health indicators **viz.** Demography, Socio-economic, Health Status, Health Finances, Health Infrastructure and Human Resources for the specified calendar year. The **sources** as well as **limitations** of the data are also appropriately indicated.

CBHI has been publishing the national Health profile (NHP) in an **attractive & reader friendly format** while also incorporating the **trend analysis** of morbidity/mortality due to various communicable diseases that accounted for maximum reported cases/ deaths during the calendar year, besides various other crucial information related to health sector in India.

This national **reference document** is of immense help to all concerned government departments & institutions, public sector enterprises, non government organizations, policy makers, planners, administrators, managers, researchers and academicians involved with health sector development in India.

I would like to **compliment** and record my **appreciation** for Dr. Ashok Kumar and his team of officers & staff of CBHI, for timely bringing out this **Fifth Issue** of "National Health Profile 2009 of India".

The **suggestions** for further improvement of this publication will be highly appreciated and may kindly be shared with CBHI/ DteGHS.GOI.

(Dr. R.K. Srivastava)
